

Measuring your Column

NOTE: It's important to take accurate measurements so that the column wrap will fit your column snug.

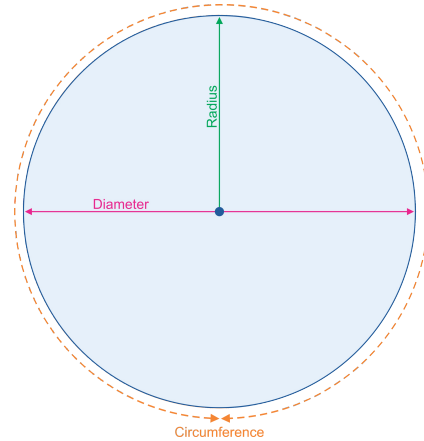

Round Poles

We will need the full 360 degrees measurement (circumference) of the pillar
If possible measure all the way around the pole with a measuring tape or string (then measure the string)

Circumference: _____ inches

Height: _____ inches

Height of the column if you want the whole pole to be covered or measurement of how tall you want it.

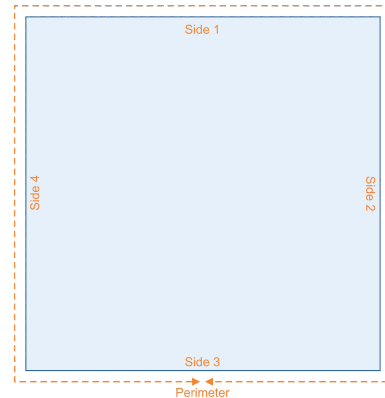

Square or Rectangle Poles

Measure each side of the column

Side 1: _____ inches

Side 2: _____ inches

Times side 1 by side 2 (side 1 x side 2) = _____ **Perimeter**

Height: _____ inches

Height of the column if you want the whole pole to be covered or measurement of how tall you want it.

Configuring File Size

Circumference or Perimeter: _____ inches + 2" = inches
Final file size width

Height: _____ inches + 2" = inches
Final file size height
