

Measuring your Pop Up Frame

NOTE: The most accurate measurements will come from corner to corner of the frame instead of across the middle of the frame because the frame could bow slightly in the middle and throw off the measurements.

Width: _____ inches

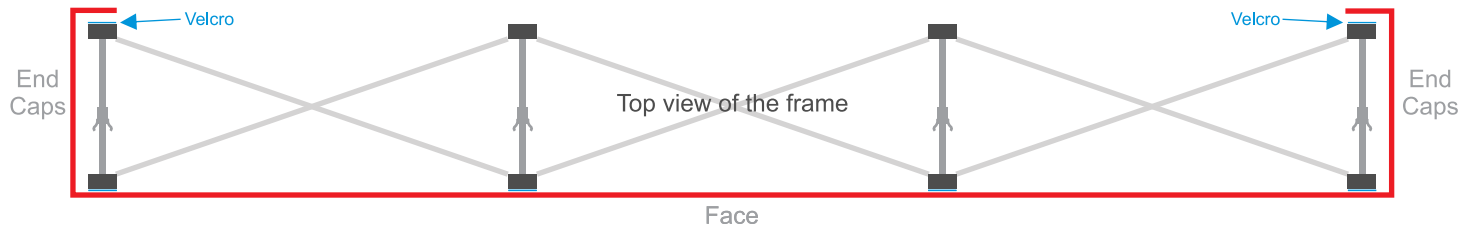

Height: _____ inches

Depth: _____ inches

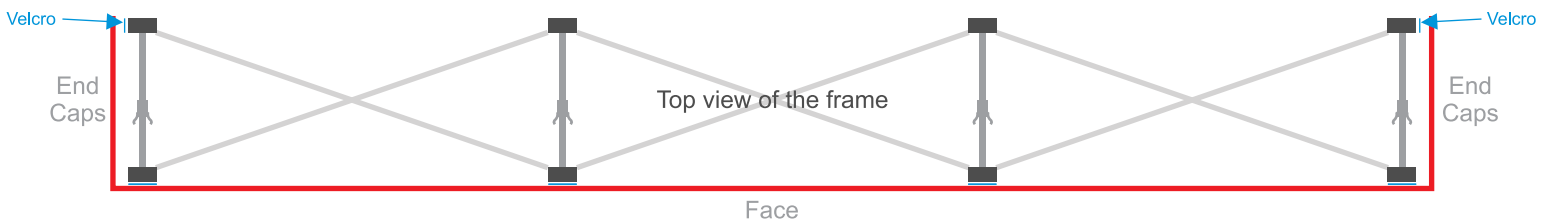

Check which one applies to your frame

My fabric wraps around the sides and on to the back of the frame

My fabric wraps around to only the sides of the frame

My fabric only covers the face of the frame
